

ABOUT THE ARTIST

Doug Gifford is an internationally-acclaimed people and event photographer and one of the most versatile visual storytellers you will find today with a relaxed, natural style. Since 1981, his balance of creativity and technical expertise has given him the opportunity to do a wide range of assignments for thousands of clients around the world for advertising, editorial, PR and personal use. He is a consummate professional with an easy-going personality who loves life and does business with integrity and a smile.

Born and raised in Southern California, he grew up on the beach, in and on the water, played baseball and golf, is a drummer, an Eagle Scout, Army Vet, worked in the grocery business during school and is a graduate of Corona del Mar High School and California State University-Fullerton. After completing college with a degree in psychology and a minor in business, Doug followed his life-long passion for photography and started the dedicated and deliberate work needed to develop his talent, become one of the best at his craft, and make it his life's work. To master the photographic craft skills (how), the psychology of photography (why) and the business of photography, Doug studied with the very best and, over time, became a recognized, award-winning photographer from local to national and international circles. He has wholeheartedly given back to his profession - to help those as he was helped - by becoming a leading member of the local, state and international professional photography organizations as a teacher, mentor, and image judge. To sustain his desire to be the best at his craft, he keeps learning and adapting every day.

With his years of experience, Doug understands the differences between images used for marketing, editorial, PR, and personal purposes, and how to create them for each use. His people skills and professionalism have given him the opportunity to be trusted to work with anyone, everywhere, in many different market segments. He genuinely cares about what you envision and, through his insightful questions, you'll work together to create a plan and build a relationship so that it feels as if you have known one another for years. It's this connection that Doug's clients feel that allows him to create great images on demand, with the right equipment, at the decisive moment, every time, for their desired purpose. In other words, Doug is a true professional photographer you can trust.

PROFESSIONAL RESUME

Doug Gifford, M.Photogr.Cr. CPP

Doug is an internationally-acclaimed, highly-skilled visual artist and master storyteller who handcrafts memorable photographic images for editorial, PR, advertising and personal use around the world. He holds the prestigious **Master of Photography, Photographic Craftsman Degrees** and is a **Certified Professional Photographer** which celebrates superior photographic competence through photographic competition, advanced education, and service to the profession from the **Professional Photographers of America (PPA)** - the world's largest nonprofit association for professional photographers, with more than 24,000 members in 54 countries. These awards, passing the judges workshop and ten years of practice as a judge helped him to become one of only 120 **PPA National Affiliate Jurors**, from 2001 to 2015. During each year's PPA competition they judged over 5,000 images which allows Doug to stay in touch with trends and techniques used by photographers from around the world. He also holds the **Fellowship and Service Awards** which are the top awards given by the **Professional Photographers of California (PPC)**, and is Past President, Lifetime Member of the **Professional Photographers of Orange County (PPOC)**. He has won numerous awards for his artistry at the local, state, national and international levels. One of the highlights was when he received a perfect score of 100 points for his print entitled "Modern Oriental" becoming the (one and only) **Grand Award Winner** in the **Wedding and Portrait Photographers International (WPPI)** print competition in 1993. All of these honors and accolades helped Doug become a member of the **Fuji Talent Team** in 1986. The team would do R & D projects and then teach his peers about those new Fuji products around the world. This helped Doug to stay in touch with technical advances in the industry - from the film to digital era. In 2001, Doug was asked to teach a portrait photography at the **University of California Irvine Extension Program** which he did until 2012. With so many of Doug's assignments being done for advertising and editorial use, he became a member of the **American Society of Media Photographers (ASMP)**. In 2007, Doug became a contributor for **Getty Images** and in 2013, he also joined **ZUMA Press** and **Corbis Images** as a contributor. With the help of these photo agencies and his client work, each year more than 150 images are being used in 100+ different types of media around the world. (See DGP Media List)
